

Ciclo while con Arduino

```
/*Esempio di ciclo while  
https://hobbyeidee.altervista.org  
*/
```

```
void setup(){  
  Serial.begin(9600);  
  pinMode(9, INPUT);  
}  
  
void loop(){  
  bool i= true;  
  while(i == true){  
    if(digitalRead(9) ==HIGH){  
      i = false;  
    }  
    Serial.print("ciao");  
    delay(500);  
  }  
  Serial.println("fine");  
  delay(2000);  
}
```
